

Kayati SL
Fabricante del CRAS,
Cemento Demoledor no Explosivo
www.kayati.com

A new look for our website

As a part of our 30th anniversary, we have renewed the appearance of our website www.kayati.com. You can find there information about the CRAS, our demolishing cement: how to use it, examples of works done with it...

The screenshot shows the Kayati website interface. At the top left is the Kayati SL logo. To its right are language selection buttons for 'ES' and 'EN'. A navigation menu includes 'Inicio', 'CRAS', 'Uso', 'Demoler', 'Cantera', 'Prensa', 'Kayati SL', and 'Contacto'. Below the navigation is a search bar with a 'Buscar' button. The main content area is titled 'Descripción del Producto' and features a sub-header '¿Qué es el Cemento Demoledor?'. Below this is an image of a large, grey, cylindrical CRAS cement block. The text describes CRAS as a non-explosive, pulverulent cement with a greyish color, based on inorganic calcium. It lists several benefits: safe and precise use, zero vibration, no explosion, noise, or dust, and no access issues or contamination. A sidebar on the right contains a table of contents with links to 'CRAS', 'Descripción del Producto', 'Cómo funciona el CRAS', 'Modo de Empleo', 'Tipos de CRAS', 'Seguridad', 'Ventajas del CRAS', and 'Alternativa a explosivos'. At the bottom of the page, contact information for the head office and factory in Vitoria Gasteiz is provided, along with the slogan 'donde el verde es capital' and a logo.

We hope you like this new design and that you find the website useful. Visit us often to know the latest on CRAS!
